

Luminary Lighting Instructions

- Fold the bags down about an inch at the top to eliminate flapping that could cause the bag to burn.
- Pour one cup of sand in the bag to keep the bags from blowing over, (the plastic cup provided is not the 1 cup you need that is just to hold the candle).
- Place the candle into the plastic cup provided. Then lower the candle into the sand in the middle of the bag. Be sure to raise the wick on each candle prior to lighting.
- Bags should be placed and lit on the street or as close to the street as possible by 4:00 PM.
- Bags should be placed approximately 5 feet apart.
- These are long burning candles and should burn through the night. Please clean up your street and remove them the next day.
